Subject Index

Aggressive fibromatosis, scintigraphy of 26
Aneurysmal bone cyst and in anticoagulated human blood, magnetic resonance imaging of fluid levels in an 267
Aneurysmal, juxtaepiphyseal, bone cyst 21
Ankle, left, dysplasia epiphysealis hemimelica (Trevor disease) of, with an associated osteochondral (post-traumatic) fracture fragment, probably arising, from talus (*case report*) 174
Anticoagulated human, blood and an aneurysmal bone cyst, magnetic resonance imaging of fluid levels in 267
Arthritis, rheumatoid: Skeletal manifestations observed on portable chest roentgenograms 295
(Arthropathy, vibratory) driller wrist 59
Articular cartilage, a dysplasia of? Familial osteochondritis dissecans 207
Atlantoaxial rotary deformity, fixed, with bilateral facet dislocation 217
Avulsion fractures, bilateral, of the anterior superior iliac spines in sprinters 65
Bilateral avulsion fractures of the anterior superior iliac spines in sprinters 65
Biopsy, excisional, of soft tissue sarcomas, limitations of computed tomography following 49
Biopsy, intraosseous gas of the left tibia after (*case report*) 327
Blood, anticoagulated human and an aneurysmal bone cyst, magnetic resonance imaging of fluid levels in 267
Bone and soft tissue tumors, magnetic resonance imaging of: early experience in 31 patients compared with computed tomography 134
Bone anomalies, congenital, associated with lipomas . . 276
Bone cyst, juxtaepiphyseal aneurysmal 21
Bone, dense – too much bone: Radiological considerations and differential diagnosis. Part I 1
Bone, dense – too much bone: Radiological considerations and differential diagnosis. Part II 97
Bone lesions during surgery, scintigraphic localization of 211
Bones, frontal and nasal, sarcoidosis affecting the (*case report, open-quiz solution*) 304
(Bronchogenic carcinoma: primary site) metastatic disease of the carpus (*case report, open-quiz solution*) 154
Bursa, isolated, non-communicating suprapatellar, a complete plica synovialis suprapatellaris, with diffuse pigmented villonodular synovitis limited to an (*case report*) 164
Calvaria, fibrous dysplasia of (multiple sclerotic lesions) (*case report, open-quiz solution*) 68
Capitate bone, right, fracture of the, and complete volar subluxation of the right scaphoid bone (*case report*) 245
(Carcinoma, bronchogenic: primary site) metastatic disease of the carpus (*case report, open-quiz solution*) 154
Carcinoma, metastatic, loosening of a total hip replacement caused by (primary in the lung) (*case report*) 77
Carpal ligamentous disruptions and negative ulnar variance 257
Carpal ligamentous laxity with bilateral perilunate dislocation in Marfan syndrome 62
Carpus, metastatic disease of the (primary site: bronchogenic carcinoma) (*case report, open-quiz solution*) . . 154
Cartilage, articular, a dysplasia of? Familial osteochondritis dissecans 207
Chest roentgenograms, portable, skeletal manifestations observed on: Rheumatoid arthritis 295
Chondromyxoid parosteal fibroma of the upper end of the femur (*case report*) 323
Chondrosarcoma, dedifferentiated, of the upper end of the humerus (*case report, open-quiz solution*) 228
Clavicle, osteomyelitis of the left, due to *Serratia marcescens* (*case report*) 80
Computed tomography, early experience in 31 patients compared with: Magnetic resonance imaging of bone, and soft tissue tumors 134
Computed tomography for the local evaluation of long bone osteosarcoma, problems and pitfalls in the use of: Report on 30 cases 147
Computed tomography, limitations of, following excisional biopsy of soft tissue sarcomas 49
Congenital bone anomalies associated with lipomas . . 276
Cyst, intrasacral (occult intrasacral meningocele) (*case report*) 314
Cyst, juxtaepiphyseal aneurysmal bone 21
Cyst, popliteal, synovial osteochondromatosis limited to a (*case report*) 234
Dedifferentiated chondrosarcoma of the upper end of the humerus (*case report, open-quiz solution*) 228
Deformity, fixed atlantoaxial rotary, with bilateral facet dislocation 217
Dense bone – too much bone: Radiological considerations and differential diagnosis. Part I 1
Dense bone – too much bone: Radiological considerations and differential diagnosis. Part II 97
Dermatomyositis, juvenile, with changes of the hallux typical of fibrodysplasia (myositis ossificans progressiva) (*case report*) 318

Desmoplastic fibroma of the proximal end of the left femur (*case report*) . . . 160
Differential diagnosis and radiological considerations – Dense bone: too much bone. Part 1 . . . 1
Differential diagnosis and radiological considerations: Dense bone – too much bone . . . 97
Dislocation, bilateral facet, fixed atlantoaxial rotary deformity with . . . 217
Dislocation, bilateral perilunate, in Marfan syndrome, carpal ligamentous laxity with . . . 62
Dislocations, fracture dislocations, and instability patterns: Radiology of trauma to the wrist . . . 120
Dissecans, familial osteochondritis: A dysplasia of articular cartilage? . . . 207
Disseminated syphilitic osteomyelitis (presumptively proved) (*case report*) . . . 239
Driller wrist (vibratory arthropathy) . . . 59
Dwarfism, a new neonatal short limbed . . . 271
Dysplasia epiphysealis hemimelica (Trevor disease) of left ankle with an associated osteochondral (post-traumatic) fracture fragment, probably arising from talus (*case report*) . . . 174
Dysplasia, fibrous, of calvaria (multiple sclerotic lesions) (*case report, open-quiz solution*) . . . 68
Elderly patients, seven cases of increasing spinal curves in: Progressive senile scoliosis . . . 280
Enchondroma protuberans of the rib . . . 55
Erythematosus, systemic lupus, widespread osteonecrosis of the foot in: Radiographic and gross pathologic correlation . . . 33
Familial osteochondritis dissecans: A dysplasia of articular cartilage? . . . 207
Femur, left, desmoplastic fibroma of the proximal end of the (*case report*) . . . 160
Femur, parosteal chondromyxoid fibroma of the upper end of the (*case report*) . . . 323
Fibrodysplasia (myositis ossificans progressiva), juvenile dermatomyositis with changes of the hallux typical of (*case report*) . . . 318
Fibrogenesis imperfecta ossium (FIO) (*case report*) . . . 72
Fibroma, desmoplastic, of the proximal end of the left femur (*case report*) . . . 160
Fibroma, parosteal chondromyxoid, of the upper end of the femur (*case report*) . . . 323
Fibromatosis, aggressive, scintigraphy of . . . 26
Fibro-osseous lesion, painless, of the rib resembling osteoid osteoma: A report of six cases . . . 263
Fibrous dysplasia of calvaria (multiple sclerotic lesions) (*case report, open-quiz solution*) . . . 68
Finger, left 5th florid reactive periostitis of proximal phalanx of the (*case report*) . . . 169
Florid reactive periostitis of proximal phalanx of the left 5th finger (*case report*) . . . 169
Foot, widespread osteonecrosis of the in systemic lupus erythematosus: Radiographic and gross pathologic correlation . . . 33
Fracture dislocations, dislocations, and instability patterns: Radiology of trauma to the wrist . . . 120
Fracture, jogger's, and other stress fractures of the lumbosacral spine . . . 221
Fractures, bilateral avulsion, of the anterior superior iliac spines in sprinters . . . 65
Frontal and nasal bones, sarcoidosis affecting the (*case report, open-quiz solution*) . . . 304
Gas, intraosseous, of the left tibia 24 hours after biopsy (*case report*) . . . 327
Hallux, juvenile dermatomyositis with changes of the, typical of fibrodysplasia (myositis ossificans progressiva) (*case report*) . . . 318
Hemimelica, dysplasia epiphysealis (Trevor disease) of left ankle with an associated osteochondral (post-traumatic) fracture fragment, probably arising from talus (*case report*) . . . 174
Hip replacement, total, loosening of a, caused by metastatic carcinoma (primary in the lung) (*case report*) . . . 77
Histiocytomas, malignant fibrous, of the soft tissues, radiology and pathology of: A report of ten cases . . . 202
Humerus, dedifferentiated chondrosarcoma of the upper end of the (*case report, open-quiz solution*) . . . 228
Hyperparathyroidism, primary (HPR), with patchy diffuse osteosclerosis at multiple skeletal sites (*case report*) . . . 248
Iliac spines, anterior superior, in sprinters, bilateral avulsion fractures of the . . . 65
Instability patterns, dislocations, and fracture dislocations: Radiology of trauma to the wrist . . . 120
Intraosseous gas of the left tibia 24 hours after biopsy (*case report*) . . . 327
Intrasacral cyst (occult intrasacral meningocele) (*case report*) . . . 314
Jogger's fracture and other stress fractures of the lumbosacral spine . . . 221
Juvenile dermatomyositis with changes of the hallux typical of fibrodysplasia (myositis ossificans progressiva) (*case report*) . . . 318
Juxtaepiphyseal aneurysmal bone cyst . . . 21
Keratoacanthoma, subungual . . . 287
Knee, use of radiographic projections of . . . 131
Ligament, posterior longitudinal, from C4 to T5, progressive paraparesis in a woman with pseudohypoparathyroidism (PHP) with ossification of the (*case report*) 310
Ligamentous disruptions, carpal, and negative ulnar variance . . . 257
Ligamentous laxity, carpal, with bilateral perilunate dislocation in Marfan syndrome . . . 62
Limitations of computed tomography following excisional biopsy of soft tissue sarcomas . . . 49
Lipomas, congenital bone anomalies associated with . . . 276
Liposarcoma, metastatic (*case report*) . . . 84
Long bone osteosarcoma, problems and pitfalls in the use of computed tomography for the evaluation of: Report on 30 cases . . . 147
Loosening of a total hip replacement caused by metastatic carcinoma (primary in the lung) (*case report*) . . . 7
Lumbo-sacral spine, jogger's fracture and other stress fractures of the . . . 221
(Lung, primary in the) loosening of a total hip replacement caused by metastatic carcinoma (*case report*) . . . 77
Lupus erythematosus, systemic, widespread osteonecrosis of the foot in: Radiographic and gross pathologic correlation . . . 33
Magnetic resonance imaging of bone and soft tissue tumors: Early experience in 31 patients compared with computed tomography . . . 134
Magnetic resonance imaging of fluid levels in an aneurysmal bone cyst and in anticoagulated human blood 267
Malignant fibrous histiocytomas of the soft tissues, radiology and pathology of: A report of ten cases . . . 202
Manubrium sterni, sclerotic changes of the . . . 195
Maquet principle, the . . . 291
Marfan syndrome, carpal ligamentous laxity with bilateral perilunate dislocation in . . . 62
(Meningocele, occult intrasacral) intrasacral cyst (*case report*) . . . 314

Metastatic carcinoma, loosening of a total hip replacement caused by (primary in the lung) (*case report*) 77
Metastatic disease of the carpus (primary site: bronchogenic carcinoma) (*case report, open-quiz solution*) . . . 154
Metastatic liposarcoma (*case report*) 84
Musculoskeletal neoplasms, staging of 183
Nasal and frontal bones, sarcoidosis affecting the (*case report, open-quiz solution*) 304
Neonatal short limbed dwarfism, a new 271
Neoplasms, staging of musculoskeletal 183
Open quiz, case report 94, 179, 253, 329
Ossification of the posterior longitudinal ligament from C4 to T5, progressive paraparesis in a woman with pseudohypoparathyroidism with (*case report*) . . . 310
Ossium, fibrogenesis imperfecta (*case report*) 72
Osteochondral fracture fragment, dysplasia epiphysealis hemimelica (Trevor disease) of left ankle with an associated, probably arising from talus (*case report*) . . 174
Osteochondritis dissecans, familial: A dysplasia of articular cartilage? 207
Osteochondromatosis, synovial, limited to a popliteal cyst (*case report*) 234
Osteoid osteoma, painless fibro-osseous lesion of the rib resembling: A report of six cases 263
Osteomyelitis, disseminated syphilitic (presumptively proved) (*case report*) 239
Osteomyelitis of the left clavicle due to *Serratia marcescens* (*case report*) 80
Osteonecrosis, widespread, of the foot in systemic lupus erythematosus: Radiographic and gross pathologic correlation 33
Osteosarcoma, long bone, problems and pitfalls in the use of computed tomography for the local evaluation of: Report of 30 cases 147
Osteosarcoma, parosteal, arising from the proximal end of the left radius (*case report*) 89
Osteosarcoma, subtle early 44
Osteosclerosis, patchy diffuse, at multiple skeletal sites, primary hyperparathyroidism (HPR) with (*case report*) 248
Paraparesis, progressive, in a woman with pseudohypoparathyroidism (PHP) with ossification of the posterior longitudinal ligament from C4 to C5 (*case report*) 310
Parosteal osteosarcoma arising from the proximal end of the left radius (*case report*) 89
Parosteal (periosteal, juxtacortical) chondromyxoid fibroma of the upper end of the femur (*case report*) 323
Perilunate dislocation, bilateral, in Marfan syndrome, carpal ligamentous laxity with 62
Periostitis, florid reactive, of proximal phalanx of the left 5th finger (*case report*) 169
Phalanx, proximal, of the left 5th finger, florid reactive periostitis of (*case report*) 169
Plica synovialic suprapatellaris, a complete, with diffuse pigmented villonodular synovitis limited to an isolated, non-communicating suprapatellar bursa (*case report*) 164
Popliteal cyst, synovial osteochondromatosis limited to a (*case report*) 234
Progressive paraparesis in a woman with pseudohypoparathyroidism (PHP) with ossification of the posterior longitudinal ligament from C4 to T5 (*case report*) . . 310
Progressive senile scoliosis: seven cases of increasing spinal curves in elderly patients 280
Projections, radiographic, of knee, use of 131
Protuberans, enchondroma, of the rib 55
Pseudohypoparathyroidism, progressive paraparesis in a woman with, with ossification of the posterior longitudinal ligament from C4 to T5 (*case report*) 310
Radiographic and gross pathologic correlation: Widespread osteonecrosis of the foot in systemic lupus erythematosus 33
Radiographic projections of knee, use of 131
Radiological considerations and differential diagnosis: Dense bone – too much bone. Part I 1
Radiological considerations and differential diagnosis: Dense bone – too much bone. Part II 97
Radiological study of 42 cases of Wilson disease 114
Radiology and pathology of malignant fibrous histiocytomas of the soft tissues: A report of ten cases 202
Radiology of trauma to the wrist: Dislocations, fracture dislocations, and instability patterns 120
Radius, left, parosteal osteosarcoma arising from the proximal end of the left (*case report*) 89
Replacement, total hip, loosening of a, caused by metastatic carcinoma (primary in the lung) (*case report*) . . 77
Rheumatoid arthritis: Skeletal manifestations observed on portable chest roentgenograms 295
Rib, enchondroma protuberans of the 55
Rib, painless fibro-osseous lesion of the, resembling osteoid osteoma: A report of six cases 263
Roentgenograms, portable chest, skeletal manifestations observed on: Rheumatoid arthritis 295
Rotary deformity, fixed atlantoaxial, with bilateral facet dislocation 217
Sarcoidosis affecting the frontal and nasal bones (*case report, open-quiz solution*) 304
Sarcomas, soft tissue, limitations of computed tomography following excisional biopsy of 49
Scaphoid bone, right, complete volar subluxation of the, and fracture of the right capitate bone (*case report*) 245
Scintigraphic localization of bone lesions during surgery 211
Scintigraphy of aggressive fibromatosis 26
Sclerotic changes of the manubrium sterni 195
(Sclerotic, multiple, lesions) fibrous dysplasia of calvaria (*case report, open-quiz solution*) 68
Scoliosis, progressive senile: Seven cases of increasing spinal curves in elderly patients 280
Senile scoliosis, progressive: Seven cases of increasing spinal curves in elderly patients 280
Serratia marcescens, osteomyelitis of the left clavicle due to (*case report*) 80
Skeletal manifestations observed on portable chest roentgenograms: Rheumatoid arthritis 295
Skeletal sites, multiple, patchy diffuse osteosclerosis at, primary hyperparathyroidism with (*case report*) . . 248
Soft tissue and bone tumors, magnetic resonance imaging of: Early experience in 31 patients compared with computed tomography 134
Soft tissue sarcomas, limitations of computed tomography following excisional biopsy of 49
Soft tissues, radiology and pathology of malignant fibrous histiocytomas of the: A report of ten cases 202
Spinal curves, increasing, in elderly patients, seven cases of: Progressive senile scoliosis 280
Spine, lumbo-sacral, jogger's fracture and other stress fractures of the 221
Spines, anterior superior iliac, in sprinters, bilateral avulsion fractures of the 65
Sprinters, bilateral avulsion fractures of the anterior superior iliac spines in 65
Sterni, manubrium, sclerotic changes of the 195
Stress fractures, other, and jogger's fracture of the lumbosacral spine 221
Subluxation, complete volar, of the right scaphoid bone and fracture of the right capitate bone (*case report*) 245

Subtle early osteosarcoma 44
Subungual keratoacanthoma 287
Suprapatellar bursa, non-communicating, isolated, a complete plica synovialis suprapatellaris, with diffuse pigmented villonodular synovitis limited to an (*case report*) 164
Surgery, scintigraphic localization of bone lesions during 211
Synovial osteochondromatosis limited to a popliteal cyst (*case report*) 234
Synovitis, diffuse pigmented villonodular, a complete plica synovialis suprapatellaris with, limited to an isolated, non-communicating suprapatellar bursa (*case report*) 164
Syphilitic osteomyelitis, disseminated (presumptively proved) (*case report*) 239
Systemic lupus erythematosus, widespread osteonecrosis of the foot in: Radiographic and gross pathologic correlation 33
Talus, dysplasia epiphysealis hemimelica (Trevor disease) of left ankle with an associated osteochondral (post-traumatic) fracture fragment, probably arising from (*case report*) 174
β-Thalassaemia, xeroradiography in 39
Tibia, left, 24 hours after biopsy, intraosseous gas of the (*case report*) 327
Trauma to the wrist, radiology of: Dislocations, fracture dislocations, and instability patterns 120
(Trevor disease) dysplasia epiphysealis hemimelica of left ankle with an associated osteochondral (post-traumatic) fracture fragment, probably arising from talus (*case report*) 174
Tumors, bone and soft tissue, magnetic resonance imaging of: Early experience in 31 patients compared with computed tomography 134
Ulnar variance, negative, carpal ligamentous disruptions and 257
(Vibratory arthropathy) driller wrist 59
Villonodular synovitis, diffuse pigmented, a complete plica synovialis suprapatellaris with, limited to an isolated, non-communicating supra-patellar bursa (*case report*) 164
Volar subluxation, complete, of the right scaphoid bone and fracture of the right capitate bone (*case report*) 245
Widespread osteonecrosis of the foot in systemic lupus erythematosus: Radiographic and gross pathologic correlation 33
Wilson disease, radiological study of 42 cases of 114
Wrist, driller (vibratory arthropathy) 59
Wrist, radiology of trauma to the: Dislocations, fracture dislocations, and instability patterns 120
Xeroradiography in β-thalassaemia 39
